Memory storage

Your menu settings are stored permanently, and in the event of a power failure will *not* be lost. Temporary settings (for example, Contrast, Overseas Mode) *will* be lost. Also, during a power failure the machine will retain the date and time and programmed fax timer jobs (e.g. Delayed Fax) for up to 60 hours. Other fax jobs in the machine memory will not be lost.

Automatic daylight savings time

You can set the machine to change automatically for Daylight Savings Time. It will set itself forward one hour in the Spring, and back one hour in the Autumn.

- 1 Press **MENU**.
- 2 Press **▲** or **▼** to display **Initial Setup**.
Press **Initial Setup**.
- 3 Press **▲** or **▼** to display **Date&Time**.
Press **Date&Time**.
- 4 Press **Auto Daylight**.
- 5 Press **On** or **Off**.

Sleep mode

The Sleep Mode Setting can reduce power consumption. When the machine is in Sleep Mode (Power Save mode) it acts as though it were turned off. Receiving data or starting an operation wakes up the machine from Sleep mode to Ready mode.

The timer will restart if any operation is carried out on the machine, such as receiving a fax or computer data or making a copy. The default setting is 3 minutes.

When the machine goes into Sleep mode, the LCD back light turns off.

- 1 Press **MENU**.
- 2 Press **▲** or **▼** to display **General Setup**.

- 6 Press **Stop/Exit**.

Deep Sleep mode

If the machine is in Sleep mode and does not receive any jobs for a certain length of time, the machine will go into Deep Sleep mode automatically. Deep Sleep mode uses less power than Sleep mode. The machine will wake up and start warming up when the machine receives a fax or computer data, or when you press the Touchscreen or a key on the control panel.

When the machine is in Deep Sleep mode, the LCD backlight is Off and the mode keys are dimmed.

If a wireless network is enabled, the machine will not enter Deep Sleep mode. To disable the wireless network, see *Chapter 5* in the *Network User's Guide*.

If the machine has secure print data it will not enter Deep Sleep mode.

Dual access (black & white only)

You can dial a number, and start scanning the fax into memory—even when the machine is sending from memory, receiving faxes or printing PC data. The LCD will show the new job number.

The number of pages you can scan into the memory will vary depending on the data that is printed on them.

Note

If you get an **Out of Memory** message while scanning the first page of a fax, press **Stop/Exit** to cancel scanning. You can broadcast to up to 390 different numbers. This will depend on how many groups, access codes or credit card numbers you have stored, and on how many delayed or stored faxes in memory.

Before you begin the broadcast

One Touch and Speed Dial numbers must be stored in the machine's memory before they can be used in a broadcast. (See *Storing One Touch Dial numbers* and *Storing Speed Dial numbers* in Chapter 7 of the *Basic User's Guide*.)

Group numbers must also be stored in the machine's memory before they can be used in a broadcast. Group numbers include many stored One Touch Dial and Speed Dial numbers for easier dialling. (See *Setting up Groups for Broadcasting* on page 38.)

Telephone line services

BT Call Sign (U.K. only)

You can set up your machine so that it only responds to the second number.

When you set the BT Call Sign feature to ON, the receive mode is set to `Manual` automatically. `Manual` mode will not respond to incoming telephone calls, since the number you use for telephone calls will use the normal ring pattern. Sometimes you may want to choose from several long distance carriers when you send a fax. Rates may vary depending on the time and destination. You can store these long dialling sequences by dividing them and setting them up as separate `One Touch` and `Speed Dial` numbers in any combination. You can even include manual dialling using the dial pad. See *Storing numbers* in *Chapter 7* of the *Basic User's Guide*.

If you use a Lower Tray, carry it separately from your machine.

! IMPORTANT

When shipping the machine, the waste toner box must be removed from the machine and put in a plastic bag, and then sealed. Failure to remove it and put it in a plastic bag before shipping may cause severe damage to the machine and may void the warranty.

Note

If for any reason you must ship your machine, carefully repack the machine in the original packaging to avoid any damage during transit. The machine should be adequately insured with the carrier.

Make sure that you have the following parts for repacking:

- 1 Plastic bag for the waste toner box
- 2 Orange packing materials for locking the internal parts (4 pieces)

Memory board

MFC-9970CDW has 256 MB of standard memory. The machine has one slot for optional memory expansion. You can increase the memory up to maximum of 512 MB by installing one SO-DIMM (Small Outline Dual In-line Memory Module).

SO-DIMM Types

You can install the following SO-DIMMs:

- 128 MB Kingston KTH-LJ2015/128
- 256 MB Kingston KTH-LJ2015/256
- 128 MB Transcend TS128MHP422A
- 256 MB Transcend TS256MHP423A

Note

- For more information, visit the Kingston Technology website at <http://www.kingston.com/>.
 - For more information, visit the Transcend website at <http://www.transcend.com.tw/>.
-

In general, the SO-DIMM must have the following specifications:

Type: 144-pin and 16-bit output

CAS latency: 4

Clock frequency: 267 MHz (533 Mb/S/Pin) or more

Capacity: 64, 128 or 256 MB

Height: 30.0 mm (1.18 in.)

DRAM type: DDR2 SDRAM

Note

- There might be some SO-DIMMs that will not work with the machine.
 - For more information, call the dealer you bought the machine from or Brother Customer Service.
-

Installing extra memory

- 1 Turn off the machine's power switch. Unplug the telephone line cord.
- 2 Disconnect the interface cable from the machine, and then unplug the power cord from the electrical socket.

Note

Be sure to turn off the machine's power switch before you install or remove the SO-DIMM.

- 3 Remove the plastic (1) and then metal (2) SO-DIMM covers.

- 4 Unpack the SO-DIMM and hold it by its edges.

! IMPORTANT

To prevent damage to the machine from static electricity, DO NOT touch the memory chips or the board surface.

- 5 Hold the SO-DIMM by the edges and align the notches in the SO-DIMM with the protrusions in the slot. Insert the SO-DIMM diagonally (1), then tilt it toward the interface board until it clicks into place (2).

- 6 Put the metal (2) and then the plastic (1) SO-DIMM covers back on.

- 7 Plug the machine's power cord back into the electrical socket first, and then connect the interface cable.

- 8 Plug in the telephone line cord. Turn on the machine's power switch.

Note

To make sure that you have installed the SO-DIMM properly, you can print the user settings page that shows the current memory size. (See *How to print a report* on page 44.)

Automatic Redial

A feature that enables your machine to redial the last fax number after five minutes if the fax did not go through because the line was busy.

Backup Print
