VPC-SH1EX
VPC-SH1
VPC-SH1GX
VPC-SH1PX
VPC-SH1TA

HIGH-DEFINITION MULTIMEDIA INTERFACE

Important note

This manual explains how to safely operate the VPC-SH1EX, VPC-SH1, VPC-SH1GX, VPC-SH1PX and VPC-SH1TA.

Any information regarding only one of these products will be labeled as such.

Please read these instructions carefully before using the camera.

Make sure to read and understand the separate booklet "SAFETY MANUAL".

Keep this manual in a safe place for later reference.

Warning

TO PREVENT THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

FOR AMERICAN USERS

The following advisory is included in accordance with the laws of the State of California (USA):

WARNING:

This product contains chemicals, including lead, known to the State of California to cause cancer, birth defects or other reproductive harm. **Wash hands after handling.**

- This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
 - Reorient or relocate the receiving antenna.
 - Increase the separation between the equipment and receiver.
 - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
 - Consult the dealer or an experienced radio/TV technician for help.
- Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Declaration of Conformity

Model number: VPC-SH1

Trade Name: SANYO

Responsible party: SANYO North America Corporation

Address: 21605 Plummer Street, Chatsworth, California 91311

Telephone No.: (818) 998-7322

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

FOR CANADIAN USERS

- This Class B digital apparatus complies with Canadian ICES-003.

FOR EU USERS

The symbol mark and recycling systems described below apply to EU countries and do not apply to countries in other areas of the world.

Your SANYO product is designed and manufactured with high quality materials and components which can be recycled and/or reused.

The symbol mark means that electrical and electronic equipment, batteries and accumulators, at their end-of-life, should be disposed of separately from your household waste.

Note:

If a chemical symbol is printed beneath the symbol mark, this chemical symbol means that the battery or accumulator contains a heavy metal at a certain concentration. This will be indicated as follows: Hg: mercury, Cd: cadmium, Pb: lead

In the European Union there are separate collection systems for used electrical and electronic equipment, batteries and accumulators.

Please, dispose of them correctly at your local community waste collection/recycling centre.

Please, help us to conserve the environment we live in!

HOW TO READ THIS MANUAL

For first-time users

Please read this manual to familiarize yourself with your camera's operation.

To use the various camera features

The Instruction Manual that explains the features in detail can be obtained from our website (page 48).

To use additional features

Visit the Sanyo website to learn how to adjust the camera settings for various shooting scenes. There you'll also find information about the software for playing back data recorded with your camera and for burning (recording) DVDs.

You may find the answers to questions or problems concerning camera operation in the sections "COMMONLY ASKED QUESTIONS" (page 54).

Symbols used in this manual

- HINT** Points giving some extended instructions or special points to pay attention to.
- CAUTION** Points that require special attention.
- (page xx)** Refer to the page indicated for detailed information.

SHOOT, PLAY BACK AND SAVE

Preparing the camera

- 1 Connect the AC adaptor to the camera.

About saving your recorded data

- If you wish to use an SD Memory Card, refer to page 12 to install the card in the camera.
- An SD Memory Card is not included with your camera. Please purchase a commercially sold card.

This camera has an internal memory, so you can shoot and record without an SD Memory Card installed.

SHOOT, PLAY BACK AND SAVE

Shooting

- 1 Press the ON/OFF button for at least 1 second to turn the camera on.**
 - If the screen to set the date and time appears, press the MENU button 2 times to cancel it.
For how to set the date and time, see page 22.

- 2 Record.**

To record a video clip:

 - Press the [] button to begin recording a video clip.
 - Press the [] button again to end the recording.

To take a photo:

 - Press the [] button.
 - A still image is captured.

Before capturing those important shots, be sure to first take a test shot to confirm that your camera is set up and ready to go

- Sanyo declines any claim for compensation for recorded contents etc. in case of photographing or recording failure due to a chance camera or card flaw.

Playback

- 1 Press the REC/PLAY button.**
 - The display changes to the Playback Screen.

- 2 Select the image to play back.**
 - Toggle the SET button left, right, up or down to move the orange frame to the image you wish to play back.
 - The image information for the framed image is shown in the bottom part of the monitor.

- 3 Press the SET button.**
 - Playback begins.

<To return to the recording mode>

 - Press the REC/PLAY button.

SHOOT, PLAY BACK AND SAVE

Deleting files

- 1** On the screen in step 2, move the orange frame to the file you wish to delete, and press the MENU button.
- 2** Select “DELETE”, and press the SET button.
- 3** Select “DELETE SINGLE”, and press the SET button.
- 4** Select “DELETE”, and press the SET button.
 - If you toggle the SET button to the left or right, the screen to delete a different file will appear.
- 5** When you are finished deleting files, press the MENU button.
 - Pressing the MENU button 3 times will return you to the screen in step 2.

When you are finished using the camera...

Press the ON/OFF button for at least 1 second to turn the camera off.

To continue to the next operation...

Please confirm that your computer is connected to the Internet.

Burn your recorded video clips onto a DVD

Using the supplied CD-ROM (Xacti Software CD), you can store your captured images on a DVD.

Install application program

- 1 Set the supplied CD-ROM in your computer's DVD drive.**
 - The installation window opens.
- 2 Click on [TotalMedia Extreme for SANYO].**
 - After clicking on the application program, follow the instructions shown on the monitor to install the program.
 - When the window appears requesting to restart your computer, click the [Finish] button to reboot.
- 3 Remove the CD-ROM from the computer's DVD drive.**
 - <About the Kodak online service>**
 - When the installation window closes, a dialog box to connect to the website introducing Kodak's online service appears. Check the [No thanks !] option button, and then click on the [OK] button.

SHOOT, PLAY BACK AND SAVE

Connect your camera to a computer

Connect your camera to a computer, and copy the desired files to the computer.

1 Use the supplied dedicated USB interface cable to connect your camera to the computer.

2 Turn on the camera.

- The USB Connection Screen appears on the camera's monitor.

-
- 3** Select “COMPUTER”, and press the SET button.
- The screen to select the computer connection mode appears.

-
- 4** Select “CARD READER”, and press the SET button.

-
- 5** Copy the data from the camera to the computer.
- The CD-ROM (Xacti Software CD) includes “TotalMedia Extreme for SANYO” with which photo and video files can be imported en bloc.

HINT

- For information on how to copy all the camera’s still image and video clip files at once, please see the support pages at the website below:
<http://www.sanyo-dsc.com/>

SHOOT, PLAY BACK AND SAVE

Burn video clips onto a DVD (for Windows Vista users)

Here's how to write your recorded data onto a DVD in the MPEG2 format. For information on other operations, please see the Help file for TotalMedia Extreme.

1 Insert a blank DVD in your computer's DVD drive.

2 Double-click the desktop [TotalMedia Extreme for SANYO] icon.

- TotalMedia Extreme for SANYO is launched, and the startup page appears.

[Create video] icon

3 Click the [Create video] icon.

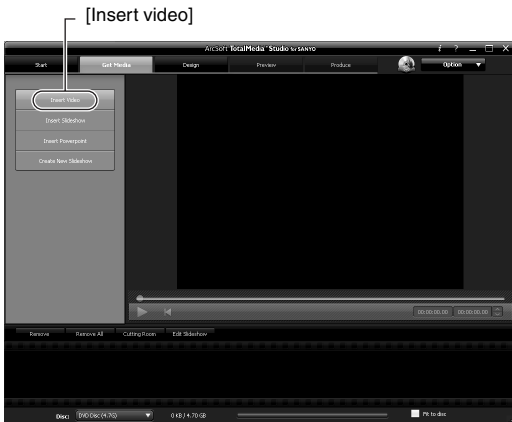

- The TotalMedia Studio screen appears.

[New DVD project]

SHOOT, PLAY BACK AND SAVE

- 4** Click [New DVD project].
- The screen to create a video clip to burn to DVD appears.

5 Click [Insert video].

- The screen to select the video clip file to burn to DVD appears.
- Click on the file you wish to burn to DVD.
- To select multiple files, keep the [Ctrl] key pressed while selecting files.

6 Click the [Open] button.

- The files you selected in step 5 and the total size of the files to burn to DVD are shown in the lower part of the window.

SHOOT, PLAY BACK AND SAVE

7 Click the [Design] tab.

- The screen to design the title menu that is shown when the DVD is played appears.
- Select one of the designs.

8 Click the [Produce] tab.

- The screen to burn files to the DVD appears.

[Burn] button

9 Click the [Burn] button.

- A window appears asking if you wish to save the project.
- Saving the project will save your settings from steps 5 through 7.
- It is recommended that you save the project if you intend to again edit the same video clips that you burned to DVD.

SHOOT, PLAY BACK AND SAVE

10 Click the [Yes] button.

- The screen to save the project appears.
- Assign a suitable file name for the project.

11 Click the [Save] button.

- The current project is saved, and the DVD burn process begins.
- When the burn process is completed, a window appears to inform you that the process is done. Remove the DVD from the computer's DVD drive.

12 Click the [OK] button.

- You are returned to the screen to burn files to DVD.

13 Click the [X] close button in the upper right corner.

- You are returned to the top page.

14 Click the [X] close button in the upper right corner.

- TotalMedia Extreme for SANYO is exited.

HINT

About software upgrades

- For information concerning TotalMedia Extreme upgrades, please go to the following website:
<http://www.arcsoft.com/en-us/index.asp>
 - If TotalMedia Extreme is launched while you are connected to the Internet, automatic program update notifications may appear.

To use Blu-ray Disc or AVCHD

- The version of TotalMedia Extreme that accompanies your camera cannot be used to burn these formats. To purchase a different version, please refer to the following website.
<http://sanyo.com/xacti/english/>

CAUTION

Does the window requesting confirmation to enable the MPEG-2 Codec appear?

When using TotalMedia Extreme for the first time, a window requesting you to confirm activation of the MPEG-2 Codec appears during the procedure. The MPEG-2 Codec must be activated in order to burn files to a DVD. Complete the following procedure to activate the MPEG-2 Codec.

- Note that your computer must be connected to the Internet in order to complete this procedure. Please confirm that your computer is connected to the Internet.
- ① **When the window requesting confirmation to activate the MPEG-2 Codec appears, click the [Yes] button.**
 - The ArcSoft website appears.
 - ② **Click on [Special downloads].**
 - The window appears for you to enter your email address, name, license ID, etc.
 - Enter the correct information.
 - The license ID is located on the back card of the supplied CD-ROM.
 - ③ **Click the [Submit] button.**
 - Soon thereafter, the URL for the download to activate the MPEG-2 Codec will be sent to the email address you entered in step ②.
 - ④ **Click the download URL link.**
 - The program will be downloaded to your computer.
 - ⑤ **Double-click the icon for the downloaded program.**
 - Follow the instructions to activate the MPEG-2 Codec.
 - DVD burning via the TotalMedia Extreme program is now enabled.
 - When the procedure above has been completed, continue to the procedure to burn to DVD.

ABOUT THE SEPARATELY SOLD ACCESSORIES AND THE CARD

Media cards that can be used with this camera

The types of card that can be inserted into and used with this camera are:

- SD Memory Card
- SDHC Memory Card
- SDXC Memory Card

What “card” means in this manual

- In this manual, SD Memory Cards, SDHC Memory Cards and SDXC Memory Cards that can be used in this dual camera are referred to as “card”.

PARTS NAMES

Sub-REC buttons

[] button
Video recording button

[] button
Photo shooting button

- ① Insert your hand in the handstrap from the top of the camera.
- ② Enfold the camera in the palm of your hand to grip it.
- ③ Use your thumb to operate the [] and [] buttons above the lens.

PARTS NAMES

Rear

Operation pad

INSTALLING THE CARD

Be sure to format a newly purchased card or one that was used in another device before using it in your camera (page 13). If an unformatted card is used, the card itself may become unusable.

Your camera has an internal memory, so you can record without a card installed.

- After inserting the card, close the card slot cover.

To extract the card...

- Press the card in once, and then release it. The card will protrude slightly, and you can then pull it out.

INSTALLING THE CARD

CAUTION

Do not attempt to forcibly remove the card

- Doing so may damage the card or the stored files.
- If the multi-indicator is flashing red...**
- Never remove the card when the multi-indicator is flashing red, as doing so may result in loss of files stored in the card.

HINT

To format a card

- ① Insert the card in the camera, and press the ON/OFF button (pages 12 and 19).
- ② Set the camera to the NORMAL mode (page 27).
- ③ Press the MENU button.
- ④ Select the [] tab, and press the SET button.
- ⑤ Select "FORMAT" and press the SET button.
 - The Format Screen appears. Follow the instructions on the screen to format the card.

Shooting without a card installed

- When a card is installed, images are recorded to and played back from the card. When no card is installed, images are recorded to and played back from the camera's internal memory. When the camera is turned on with no card installed, the internal memory icon  is shown on the monitor to let you know that the images you capture will be saved to the camera's internal memory.

CHARGING THE BATTERY PACK

Please charge the supplied battery pack before using it. Install the battery pack in the camera, and connect the AC adaptor to charge the battery. Power to the camera can also be supplied from a power outlet when the AC adaptor is connected.

1 Open the battery cover.

CHARGING THE BATTERY PACK

2 Insert the battery pack, then replace the battery cover.

3 Use the power cord to connect the AC adaptor to a power outlet.

- Charging begins.

<During charging...>

- During charging, the multi-indicator is lit red. When charging is completed, the indicator turns off.
- The multi-indicator flashes red if the battery pack is defective or is not installed correctly. Make sure that the battery pack is correctly installed.
- The charging time is approx. 180 minutes.

CHARGING THE BATTERY PACK

CAUTION

Do not charge the battery pack immediately after the camera has been in continuous use for a long time

- The battery pack becomes hot when the camera is used continuously for a long time. If you attempt to charge the battery pack in this state, the multi-indicator may flash red and it may not be possible to charge the battery pack. Wait until the battery pack has cooled down before attempting to charge it.

Does the battery pack appear swollen?

- The lithium-ion battery used in this camera may expand slightly when stored in a hot environment or repeatedly used, but this is not a safety hazard. However, a battery that is difficult to insert because it has become swollen may then be impossible to extract from the battery compartment. In this case, please discontinue its use and replace it with a new battery.

Do not use the battery with the outer covering or label removed

- Doing so may result in malfunction.

HINT

About the internal backup battery

- This camera's internal battery serves to maintain the date and time settings, as well as the shooting settings. The backup battery will be fully charged when the battery pack is kept in the camera continuously for about 2 days. In the fully charged state, the backup battery will maintain the camera settings for about 7 days.

When not using the camera for a long time, remove the battery pack

- A small amount of power is still used even if the camera is turned off, and it is therefore recommended that the battery pack be removed from the camera if it is not going to be used for a long time. Note that when the battery pack is removed for a long period, the time and date settings may be cleared. Before using your camera again, be sure to confirm that the camera settings are correct.

Recharging when connected to the USB terminal

- The battery can be recharged while the camera is connected to a computer.
- Note, however, that the time it takes to recharge will differ depending on the camera's operating condition.
- Connect the dedicated USB interface cable to the USB connector on your computer. Do not connect it to the USB connector on the monitor or the keyboard, or to the USB hub.
- If the camera is not going to be used for an extended period of time, please disconnect the dedicated USB interface cable from the camera.

About recharging

Recharging takes place only when the camera is turned off, or when the power save function or the sleep function has been activated. Recharging does not take place when the camera is in the recording mode or playback mode.

About the temperature alert icon

During camera use, if the temperature of the battery or inside the camera (excluding the battery) rises, a temperature alert icon  will appear as described below.

■ When the battery or internal camera (excluding battery) temperature rises during use

- During camera use, if the temperature of the battery or inside the camera (excluding the battery) rises, a  icon lights on the monitor. It is still possible to record and play back even when the  icon is lit; however it is advised that you discontinue use as soon as possible and turn the camera off.
- If the temperature rises further, the  icon will start to flash, and the camera will turn off automatically.
The camera cannot be turned on until the temperature has dropped (or as long as the  icon remains flashing). Please wait until the temperature has dropped before resuming use.
- During video recording, a countdown indicator will show the time starting about 15 seconds before shutdown. When the indicator shows 0 seconds, recording stops.
- If the camera is turned off while the temperature is high (that is, while the  icon is flashing), it cannot be turned on again until the temperature has dropped (or as long as the  icon remains flashing).

TURNING THE CAMERA ON AND OFF

Turning on the camera

1 Open the monitor unit, and press the **ON/OFF** button for at least 1 second.

- If you press the REC/PLAY button for at least 1 second, the camera turns on in the playback mode.
- If you briefly press the ON/OFF button, once, the camera will switch to the power save mode.

Monitor unit

Turning off the camera

1 Press the **ON/OFF** button for at least 1 second.

- The camera turns off.

Turning on the camera when the power save (sleep) mode is active

In order to preserve battery pack power, the power save (sleep) function will automatically turn off the camera after about 1 minute of no use during shooting, or about 5 minutes of no use during playback (factory-preset setting).

- When the power save mode is active, you can restore the power by any of the following methods:
 - **Press the ON/OFF button.**
 - **Press the [] or [] button.**
 - **Press the SET button.**
- After the power save mode has been active for about 1 hour, the camera will switch to the standby mode. In this case, you can restore the power by pressing the ON/OFF button, or by closing and then opening the monitor unit.
- When the AC adaptor is connected, the power save mode will become active about 5 minutes after the camera is turned on (factory-preset setting).
- When the camera is connected to a computer or printer, the power save mode becomes active after about 12 hours.

TURNING THE CAMERA ON AND OFF

HINT

To immediately activate the power save mode

- Press the ON/OFF button briefly to activate the power save function.

About the standby mode

- To turn off the camera only briefly, you can close the monitor unit to put the camera in the standby mode. The standby mode uses almost no power. When the monitor unit is opened again, the camera turns on immediately and you are ready to shoot or view images without any delay.

CAUTION

If the icon appears...

- When a picture is taken, the date and time it was captured are recorded with it. If the date and time settings have not been completed (page 22), the date and time cannot be recorded with the captured images. For this reason, immediately after the camera is turned on, the “Set date and time” reminder briefly appears, after which the  icon is shown on the Recording Screen. To have the date and time recorded with the images, please complete this setting before capturing images.

DATE AND TIME SETTING

The camera will record the date and time an image or audio recording is taken so that you can display them during playback. Therefore, before capturing images, make sure the correct date and time are set.

- To correct the date and time setting, please see under **HINT** on page 24.

Example: To set the clock to 7:30 p.m. on December 24, 2010

1 Turn on the camera (page 19), and press the SET button.

- The Clock Set Screen appears.
- Follow the procedures below to enable or disable the date display during playback, to set the display format for the date, and to set the date and time.
- To display the Recording or Playback Screen, press the MENU button 2 times.

2 Set the date.

- ① Select "DATE".
- ② Press the SET button.
 - The Set Date Screen appears.
- ③ Set the date to "2010/12/24".
 - The date is set in the following order: Set the year → Set the month → Set the day.
 - Toggle the SET button left or right to select year, month or day. Toggle the SET button up or down to increase or decrease the number.
- ④ Press the SET button.

DATE AND TIME SETTING

3 Set the clock.

- ① Select "TIME".
- ② Press the SET button.
 - The Set Time Screen appears.
- ③ Set the time to "19:30".
 - The time is set in the following order: Set the hour → Set the minute.
 - A 24-hour clock is used for the time display.
- ④ Press the SET button.

4 Set the order in which the date is displayed during playback.

- ① Select "DISP".
- ② Press the SET button.
 - The Set Date Format Screen appears.
- ③ Toggle the SET button up or down.
 - Toggle the SET button up to change the displayed date order as follows:

→ D / M / Y → Y / M / D → M / D / Y →

Toggle the SET button down to change it in the reverse order.

- ④ Press the SET button.

5 Press the MENU button.

- The date and time setting is completed.
- To display the Recording or Playback Screen, press the MENU button.

HINT

- Under normal conditions, while the battery pack is being replaced, an internal battery will maintain the date and time settings. However, there is a small chance the settings may be lost (the backup will last for about 7 days). It is recommended to check that the date and time settings are still correct after replacing the battery pack and before shooting or recording of any type (follow step 1).

To correct the date and time settings

- ① Turn on the camera.
- ② Display the Option Menu 1 (page 28).
- ③ Select "CLOCK SET" and press the SET button.
 - The screen to set the date and time appears.
 - The current date and time settings are shown.
- ④ Select the line you wish to change, and make the correction.

SWITCHING BETWEEN THE RECORDING MODE AND PLAYBACK MODE

Switch between the recording mode (for recording) and the playback mode (for viewing your recorded images).

1 Turn on the camera (page 19).

2 Press the **REC/PLAY** button.

- The mode changes.
- The mode changes each time the REC/PLAY button is pressed.

<Example of the recording mode>

<Example of the playback mode>

SIMPLE MODE/NORMAL MODE

About the SIMPLE mode and NORMAL mode

The “SIMPLE mode” comprises only those functions that are most often used and necessary to operate the camera, while the “NORMAL mode” enables full use of all the camera’s many functions. Select the mode that is suitable for your purposes.

<SIMPLE Mode Setting Screen>

<NORMAL Mode Setting Screen>

SIMPLE MODE/NORMAL MODE

Switching between the SIMPLE and NORMAL modes

- 1 Turn on the camera (page 19).**
 - The previous mode is active.
- 2 Press the MENU button.**
 - The Menu Screen for the active mode appears.

- 3 Select the operating mode icon, and press the SET button.**

- Switch from the SIMPLE mode to the NORMAL mode, or from the NORMAL mode to the SIMPLE mode.
- Press the MENU button to cancel the Menu Screen.

Operating mode icon

<SIMPLE Mode Menu Screen>

<NORMAL Mode Menu Screen>

Accessing/exiting the SIMPLE/NORMAL Mode Menu Screen

- 1 Set the camera to the recording or playback mode (page 25).
- 2 Select the desired operating mode (page 27).
- 3 If the Menu Screen is not displayed, press the MENU button.
 - The Menu Screen appears.
 - To cancel the Menu Screen, press the MENU button.

<Example: SIMPLE Mode Recording Menu>

<Example: NORMAL Mode Recording Menu>

Option tab

VIDEO CLIP RECORDING

- 1 Turn on the camera (page 19), and set it to the recording mode (page 25).

- 2 Press the [] button.
 - Recording begins.
 - It is not necessary to keep the [] button pressed while recording.
 - When the remaining recording time available for the currently recording clip becomes little, a countdown of the remaining recording time appears on the display.

- 3 End the recording.
 - Press the [] button again to stop recording.

SHOOTING SINGLE SHOTS

Capture a still image (single-shot).

- 1 Turn on the camera (page 19), and set it to the recording mode (page 25).

- 2 Press the [] button.

- ① Press the [] button halfway.

- The autofocus operates, and the image is focused (focus lock).

- ② Continue to gently press the [] button all the way.

- The shutter releases and the image is captured.
- You can view the captured image on the monitor by keeping the [] button depressed when you capture the image.

Target mark

SHOOTING SINGLE SHOTS

HINT

Adjusting the monitor brightness

- While the Recording Screen is active, you can quickly access the screen for adjusting the brightness of the monitor by pressing the MENU button for at least 1 second.

What is the camera focusing on?

- A target mark [] on the monitor shows the area the camera is focusing on.
- The camera automatically determines the correct focus by measuring from 9 different focus points within the shooting area. If the target mark is at a position that is different from the point you wish to focus on, you can refocus, for example, by changing the shooting angle.
- The large target mark appears when the camera focuses on a wide area in the center of the screen.

The shutter speed and aperture are displayed (NORMAL mode)

- The shutter speed and aperture settings are shown on the Recording Screen. You can use them as a reference when shooting.

If the camera shake icon appears... (NORMAL mode)

- During still image shooting, if the shutter speed is slow and the possibility that the image may be blurred due to camera shake becomes high, the camera shake icon may appear on the monitor. In this case, use a tripod to stabilize the camera when shooting, or set the flash operation mode to automatic.
- When shooting with the scene select function set to the fireworks [] mode, the camera shake icon always appears, but this is normal.

Does it seem to take a long time to save images?

- When shooting in dimly lit conditions, it may take some time to save the data to the card.

Using the flash

The flash is not only used for photographing under dark conditions, but is also convenient for example when the subject is in shadow or lit from behind. The flash is available only when shooting single-shot still images.

- 1 Display the **SIMPLE Mode Recording Menu** (page 28), select the flash setting, and press the **SET** button.

- The screen to select the flash operation appears.

- : The camera detects the subject brightness and uses the flash only when necessary.
- : The flash operates with every image captured regardless of the conditions.
- : The flash does not operate even in dark situations.

- 2 Select the desired flash operation, and press the **SET** button.

- This completes the flash operation setting.

- 3 Press the [] button to take the picture.

SHOOTING SINGLE SHOTS

CAUTION

Do not touch the flash unit when shooting

- The flash unit becomes very hot and may cause a burn. Avoid touching the flash unit when shooting.

HINT

- The flash cannot be used during video clip recording.
- By assigning an operation shortcut to the SET button (page 48), you can change the flash mode from the Recording Screen (NORMAL mode).

FIELD OF VIEW (Normal mode)

You can select whether to display either the Photo View Shooting Screen or the Movie View Shooting Screen.

The field of view is easier to see when the Shooting Screen for the specific shooting mode is selected.

To select the desired field of view, use the Option Setting Screen to set an operational shortcut (page 48).

<Video view>

<Photo view>

SHOOT A STILL IMAGE WHILE RECORDING A VIDEO CLIP

You can capture a still image (a single-shot) while recording a video clip.

- 1** Turn on the camera (page 19), and set it to the recording mode (page 25).
- 2** Press the [] button.
- 3** When you see a scene you'd like to capture as a still image, press the [] button.
- 4** Press the [] button to end the video clip recording.

SHOOT A STILL IMAGE WHILE RECORDING A VIDEO CLIP

HINT

- When shooting a still image while recording a video clip, the flash does not operate.
- The photo stabilizer (page 48) is inoperative.
- When the remaining video recording time becomes approximately 50 seconds, it will no longer be possible to capture a still image while recording a video clip. The exact remaining recording time at which this occurs will differ depending on the subject and on the recording size (page 48), as well as on the video clip recording mode (page 48). If you intend to capture a still image while recording a video clip, it is suggested that you take note of the remaining video recording time.

About the recording size of still images

- The size of a still image captured during video clip recording depends on the video clip recording size.

Video clip recording size setting	Still image recording size
	 (16:9)
	 (16:9)
	 (4:3)

- It is not possible to capture a still image while recording a video clip at a high recording speed (, ) or in the  mode.
- It is not possible to capture sequential shots.

MACRO-PHOTOGRAPHY (ZOOM)

Your camera has two zoom functions: optical zoom and digital zoom.

1 Point the camera lens at the subject.

2 Push the zoom switch toward [T/🔍] or [W/📐] to compose the desired image.

[T/🔍]: Zoom in on the subject.

[W/📐]: Zoom out.

- When the zoom switch is pushed, the zoom bar appears on the monitor.
- When the optical zoom factor is at maximum, zooming stops temporarily. When the zoom switch is pushed toward the [T/🔍] side again, the mode changes to the digital zoom mode and zooming continues.

3 Take the picture.

For video clip recording, see page 29.

For shooting single shots, see page 30.

Zoom switch
[T/🔍]/[W/📐]

When optical zoom only is enabled

Pointer

MACRO-PHOTOGRAPHY (ZOOM)

HINT

When recording video clips at a high magnification

- When recording video clips at a high magnification, a moving subject or moving camera can cause camera shake, resulting in a distorted playback image. This phenomenon is due to the characteristics of the CMOS sensor and is not a malfunction.
- It is recommended that you use a tripod to stabilize the camera when recording video clips at a high magnification.

About the “30x Advanced Zoom”

- During video clip recording, the “30x Advanced Zoom” function makes it possible to electronically magnify the image with no image degradation, and increase the magnification to a maximum 30x.

PLAYING BACK VIDEO CLIPS AND STILL IMAGES

1 Set the camera to the playback mode (page 25).

2 Select the image to play back.

- Toggle the SET button left, right, up or down to move the orange frame to the file you wish to play back.
- The image information for the framed image is shown at the bottom of the screen.

3 Press the SET button.

- Playback begins.

<To return to the screen to select playback files>
Toggle the SET button down.

PLAYING BACK VIDEO CLIPS AND STILL IMAGES

Video clip playback operation

To do this...		Do this
Normal forward playback		Press the SET button.
Stop playback		During playback, toggle the SET button down.
Pause		During playback, press the SET button or toggle the SET button up. During accelerated playback, toggle the SET button up.
To play back one image at a time (single-frame step)	During forward playback	After pausing playback, toggle the SET button to the right.
	During reverse playback	After pausing playback, toggle the SET button to the left.
Slow playback	During forward playback	After pausing playback, press and hold the SET button to the right.
	During reverse playback	After pausing playback, press and hold the SET button to the left.
To accelerate playback	Forward playback	During forward playback, toggle the SET button to the right. <ul style="list-style-type: none"> The playback speed changes each time the SET button is toggled to the right, as follows: Normal playback → 2× → 5× → 10× → 15× Toggle the SET button to the left to resume normal playback speed.
	Reverse playback	During forward playback, toggle the SET button to the left. <ul style="list-style-type: none"> The playback speed changes each time the SET button is toggled to the left, as follows: 15× ← 10× ← 5× Toggle the SET button to the right to resume normal playback speed.
Return to normal playback speed		Press the SET button.
Adjusting the volume		Louder: During playback, push the zoom switch toward the [T] side. Softer: During playback, push the zoom switch toward the [W] side.

HINT

If the  icon appears on the playback Screen...

- The  icon appears when playing back a file that was saved in segments (page 48).

PLAYING BACK VIDEO CLIPS AND STILL IMAGES

How to save one frame from a video clip as a still image

- 1** Play back the video clip. Pause the playback at the point you wish to “snap” a photo.
- 2** Press the [] button.
 - The screen to select the aspect ratio of the still image appears. Select the desired aspect ratio, and press the [] button. Note, however, that if the video clip aspect ratio is 4:3, you cannot select 16:9.
 - It is not possible to save a frame from a video clip that was recorded in the  mode.

HINT

The file size for a video clip is very large

- Therefore, be aware that if the video clip is uploaded to a computer to be played back, the computer may not be able to play back the video fast enough, making it appear jerky. (The video will always be displayed properly on the camera monitor or a television.)
- Depending on the card, shooting may end even before the possible shooting time indicated.

Display the video clip playback point

- During video clip playback, press the MENU button for at least 1 second to display a bar showing the current playback point in the video clip.
- Press the MENU button for about 1 second to cancel the bar.

CAUTION

During video clip playback, the sound of a motor is audible...

- During recording, the sound of the optical zoom movement or autofocus movement was recorded. This is not a malfunction.

If no audio is heard...

- The audio is not played back when the video clip is played back in the frame-by-frame, fast playback or reverse playback mode.

SLIDESHOW PLAYBACK

You can play back files in succession with the “slideshow playback” feature.

- 1** Display the **SIMPLE Mode Playback Menu (page 28)**, select the **slideshow setting**, and press the **SET** button.

- : Play back all files.
- : Play back video clips and audio files.
- : Play back still image files.

- 2** Select the type of file to play back, and press the **SET** button.
- Slideshow playback begins.
 - To stop slideshow playback, press the SET button or MENU button.

HINT

About the slideshow settings

- The slideshow settings can be changed from the **NORMAL Mode Playback Menu (page 48)**.

PLAYBACK VOLUME

Adjust the playback volume for video clips and audio files.

- 1 Display the SIMPLE Mode Playback Menu (page 28), select the playback volume setting, and press the SET button.**
 - The volume control bar appears.

- 2 Toggle the SET button to the left or right to set the volume, and press the SET button.**
 - The playback volume is set, and the display returns to the SIMPLE Mode Playback Menu.

HINT

The volume can be adjusted during playback

- During video clip or audio file playback, if you push the zoom switch toward [T/🔍] or [W/📺], the volume control bar will appear, allowing you to adjust the volume.

In the NORMAL mode

- When you select "PLAY VOLUME" from the NORMAL Mode Playback Menu and press the SET button, the volume control bar appears.

CONNECTING TO A STANDARD VIDEO INPUT TERMINAL

About image output: The image output destination differs depending on the connection cable.

Connection cable	Image output destination	Recording mode		Playback mode
		Standby	Recording	
Dedicated AV interface cable	Camera monitor	NTSC: × PAL: ○	○	×
	TV	NTSC: ○ PAL: ×	×	○
HDMI cable	Camera monitor	×	○	×
	TV	○	×	○

○: Images are output ×: Images are not output

CONNECTING TO A STANDARD VIDEO INPUT TERMINAL

* Please affix the core.

ENJOY HIGHER IMAGE QUALITY

Connecting to the HDMI terminal

NOTE

Insert and pull out the cable carefully

- When connecting the cables, make sure that the cable plugs are correctly oriented and that they match the shapes of the terminal sockets on the devices. Push the plugs in straight when connecting them. If undue force is used to connect a cable, it may permanently damage the connector pins in the terminal socket.
- Do not use excessive force when connecting and disconnecting cables.

HDMITM
HIGH-DEFINITION MULTIMEDIA INTERFACE

PLAYING BACK ON A TV

- After connecting the camera to the television, switch the TV input to the terminal to which the camera is connected.
- When the camera is connected to a TV, no image appears on the camera's monitor.
- The playback method is the same as when viewing images on the camera's monitor.
- Use the TV controls to adjust the playback volume. The camera's controls will not work to adjust the volume.

OBTAINING THE INSTRUCTION MANUAL

The Instruction Manual that explains the features in detail can be downloaded from our website.

- “Adobe Reader” is required to view the Instruction Manual. If Adobe Reader is not already installed on your computer, a link to the website from which you can download it can be found on our website.

Contents of the Instruction Manual

Explanations for the functions indicated below can be found in the downloadable Instruction Manual.

Please be sure to obtain and use the Instruction Manual.

HINTS FOR TAKING PICTURES

How to obtain the Instruction Manual

The Instruction Manual that explains the camera functions in detail can be obtained from the SANYO website.

- 1** Insert the supplied Xacti Software CD in your computer's CD drive.
- 2** On the installation screen, click [Go to Xacti SH1 Web Support Page].
- 3** Follow the instructions on the screen to download the Instruction Manual.
 - "Adobe Reader" is required to view the Instruction Manual.
Adobe Reader can be found in the Xacti Software CD.

ABOUT THE EYE-FI TRANSFER FEATURE

By inserting a commercially sold Eye-Fi card (SD card with wireless LAN) in your camera, you can easily upload photos to your computer, a sharing site, etc. automatically via a Wi-Fi network. Also, you can transfer video files if your Eye-Fi card has a video upload function. The Eye-Fi card settings can be performed using the Eye-Fi Manager, but in addition, the settings below can be performed with this camera.

- Eye-Fi automatic transfer ON/OFF
- Automatic halt of Eye-Fi operation when battery is low
- AC adaptor connection restrictions (may or may not be supported, depending on the camera)
- SSID setup/delete

HINT

- The Instruction Manual for the Eye-Fi transfer feature can be obtained from the Sanyo website (page 52).
 - * “Adobe Reader” is required to view the Instruction Manual. Adobe Reader can be found in the Xacti Software CD.

COMMONLY ASKED QUESTIONS

If you have a question about the camera operation, you might find the answer in this compilation of commonly asked questions.

	Question	Answer	Action
Power	Why doesn't the power turn on?	Due to cold temperatures, the battery pack temporarily lost its power.	Place the camera in your pocket to warm it up before using it.
	Why is the battery pack consumed so quickly even after it was fully recharged?	The ambient temperature is very low.	Keep the battery pack in an environment of 10 to 40 °C (50 to 104°F).
		The battery pack life has expired.	If a battery becomes depleted quickly even after it was sufficiently charged, it should be assumed that the battery has reached the end of its service life. Please replace it with a new battery.
	Why doesn't recharging end?	The battery pack life has expired.	Replace with a new battery pack. If this is not effective, consult your dealer.
Why does the  icon appear?	The remaining battery pack power is low.	Use the supplied AC adaptor, or replace the battery pack with a fully charged one.	

COMMONLY ASKED QUESTIONS

	Question	Answer	Action
Shooting	Why does the multi-indicator flash red?	A recorded file is being saved on the card or internal memory.	Not a malfunction. Wait until the multi-indicator turns off.
	Why doesn't the flash operate?	The camera has determined that the image is bright enough and the flash is not necessary.	Not a malfunction. Capture the image; the camera will determine when the flash is necessary.
	Are the settings retained even after the camera is turned off?	—	All settings except the self-timer and the exposure compensation are retained even after the camera is turned off.
	Which resolution setting should I use?	—	Select the resolution setting according to the intended use. 10M , 7M , 4M-H , 4M-S , 3.5M , 10M_u , 4M_u : Appropriate for printing letter-size or larger, and for printing a close-up of part of a photo (trimming). 2M , 2M : For printing standard photo (photo service) sizes. 0.9M , 0.3M : For photos displayed on a web page, or sent as e-mail attachments.

	Question	Answer	Action
Shooting	What is the difference between the digital zoom and the optical zoom?	—	Because shooting with the optical zoom uses the optics of a physical lens, you can shoot without losing minute details in the image. The digital zoom, on the other hand, works by magnifying a portion of the image that hits the image sensor and may produce a coarser image.
	How can I get the distant view into focus?	—	Set the scene select function to the landscape  mode when photographing. Or, set the focus range setting to manual focus [MF] , and set the distance to ∞ .

COMMONLY ASKED QUESTIONS

	Question	Answer	Action
Monitor	When used in cold weather, why does the image seem to leave traces as it moves?	Condition due to the monitor characteristics.	Not a malfunction. Spots that appear in the monitor only appear in the monitor and will not be recorded with the images.
	Why does the displayed image contain some red, blue and green dots, or why are black spots visible?		
Viewing images	Why is the image too bright?	The subject was too bright.	When capturing an image, devise a way to compensate for a bright subject, for example, by changing the shooting angle.
	Why is the image out of focus?	The focus is not locked properly.	Hold the camera correctly and slowly press the [] button halfway to lock the focus. Then press the [] button all the way to capture the image.

	Question	Answer	Action
Viewing images	Why is there no image (□ is shown)?	Playback error may occur when trying to play back files that were recorded with a different digital camera.	Play back files that were recorded on a card using this camera.
	Why is the playback image distorted?	If the subject moves or the camera is moved during recording, a distorted image may sometimes occur.	Not a malfunction. This is a characteristic of the CMOS sensor.
	Why isn't the magnified image clear?	Due to the characteristics of the camera, magnified images appear less clear.	Not a malfunction.
	Why isn't the captured image clear?	The image was captured using the digital zoom.	Not a malfunction.
	Can I play back image and sound files that I edited using my computer?	—	We cannot guarantee the accurate playback of files that have been edited using a computer.
	Why is there a motor-like sound during video clip playback?	The sound of the camera's mechanical action was recorded.	Not a malfunction.

COMMONLY ASKED QUESTIONS

	Question	Answer	Action
Connecting to a TV	Why is there no sound?	The volume on the TV is set to the minimum.	Adjust the volume on the TV.
	What is the difference among the normal video (composite video) output and HDMI output?	—	Normal video (composite video) output: Combines Y (luminance) signal and chrominance signal and outputs the combined signal. HDMI signal: Outputs the Y signal, B-Y signal and R-Y signal separately. The picture quality becomes increasingly higher, in order from normal video output, to HDMI output.

	Question	Answer	Action
Printing	Why does a message appear during PictBridge printing?	There is a problem with the printer.	Please refer to the instruction manual for your printer.
Misc.	The "Cannot edit video clips with unlike settings" message appears.	You have attempted to join video clips having different resolutions or frame rates.	Select video clips that have the same resolution or frame rate.
	Why is a noise heard from a nearby TV or radio during battery recharging?	Electromagnetic waves are emitted from the AC adaptor.	Move the AC adaptor further away from the TV or radio when recharging the battery pack.
	Why does the "Insufficient card memory" or "Insufficient internal memory" message appear?	There is no more available memory on the card or in the camera's internal memory.	Delete unnecessary files, or use a card that has more memory available.
	Why does the "Card is protected" message appear?	The lock switch on the card is in the locked (protect) position.	Move the lock switch to the unlocked position.
	Why can't the camera be operated?	A temporary internal circuitry problem may be the cause.	Remove the AC adaptor and the battery pack from the camera, wait a few minutes, then reinstall the battery pack and try again.

COMMONLY ASKED QUESTIONS

	Question	Answer	Action
Misc.	A problem such as inability to record or play back occurs.	The card or internal memory contains files that were saved using a device other than this camera.	After saving your files to a different medium, format the card or internal memory.
	Can I use my camera abroad?	—	When the camera is connected to a TV, you can switch the camera's video output to NTSC or PAL. If you have questions about accessories etc., please consult with a dealer near you for advice.
	Why does the "System error" message appear?	A problem has occurred within the camera or card.	Check the following items: ① Remove the card and then install it again. ② Remove the battery pack and then install it again. ③ Install a different card. If "System error" still appears after performing the above steps, then take the camera to the dealer for service.

SPECIFICATIONS

Camera

Recorded image file format	<p>Still images: JPEG format (DCF, DPOF, Exif 2.2 compliant) Note: Designed mainly by the Japan Electronics and Information Technology Industries Association (JEITA), DCF (Design rule for Camera File system) is standard for digital still camera image files to provide interoperability between digital photography devices for the images stored on removable memory cards. However, it is not guaranteed that all devices will support the DCF standard.</p> <p>Video clips: Conforms to ISO-standard MPEG-4 AVC/H.264*</p> <p>Audio: MPEG-4 audio (AAC compression) 48 kHz sampling rate, 16-bit stereo format</p>

Sequential shots mode: 1/15 to 1/1,000 sec. (no flash) Video clip recording mode: 1/30 to 1/10,000 sec. (1/15 sec. max.: when scene select function is set to the lamp  high sensitivity mode)</p>

SPECIFICATIONS

Sensitivity	<p>Still image shooting (standard output sensitivity*)/ video clip recording mode:</p> <p>Auto (video clip recording: ISO 50 to 1600; still image shooting: ISO 50 to 400)/ISO 50, ISO 100, ISO 200, ISO 400, ISO 800, ISO 1600, and ISO 3200 (switchable from the Recording Menu)</p> <ul style="list-style-type: none"> • Sensitivity measured in compliance with the ISO standard (ISO 12232:2006). • Maximum ISO sensitivity up to 2400 equivalent when Scene Select function is set to . • Recorded at ISO 2400 in the video clip recording mode, even if ISO sensitivity setting is . 	
Minimum subject illumination	<p>Approx. 10 lux (1/30 sec in the scene select AUTO mode) Approx. 4 lux (1/15 sec in the HIGH SENSITIVITY or lamp mode)</p>	
Image stabilizer	<p>Video: Electronic Still image: Multi-calculation electronic</p>	
Monitor	<p>2.7" (6.9 cm) low-temperature polysilicon TFT color wide liquid crystal (transmissive), approx. 230,000 pixels</p>	
Flash working range	<p>GN = 4.0 Approx. 50 cm (19.69 in.) to 2.3 m (7.55 ft.) (wide) Approx. 1 m (3.28 ft.) to 2 m (6.56 ft.) (tele)</p>	
Flash modes	<p>Auto-flash, forced flash, flash off</p>	
Focus	<p>TTL-type AF (still image shooting mode: 9-point range finder/spot focus; video clip recording mode: Continuous focus), manual focus</p>	
Self-timer	<p>Approx. 2-second delay, 10-second delay</p>	
Ambient environment	Temperature	<p>0 to 40 °C (32 to 104°F) (operation) 0 to 35 °C (32 to 95°F) (when charging) -20 to 60 °C (-4 to 140°F) (storage)</p>
	Humidity	<p>30 to 90% (operating, no condensation) 10 to 90% (storage, no condensation)</p>

Power supply	Battery pack (supplied)	Li-ion battery pack (DB-L90) ×1
	AC adaptor (supplied)	VAR-G11
Power consumption		2.9 W (When using the Li-ion battery during recording)
Dimensions (excluding protrusions)		42.8 (W) × 117.9 (D) × 59.2 (H) mm 1.69 (W) × 4.64 (D) × 2.33 (H) in. (Maximum dimensions) Volumetric capacity: Approx. 190 cc
Weight		Approx. 204 g (7.2 oz.) (camera only [without battery pack and card]) Approx. 235 g (8.3 oz.) (including battery pack and card)

SPECIFICATIONS

Camera connectors

USB/AV terminal	Regrouped jack	
	Audio output	Stereo
	Video output	Composite video NTSC color TV system/PAL color TV system (switchable from the Option Screen)
	USB 2.0 High Speed PC camera: USB video class	
HDMI terminal	Video output Total number of scan lines (effective number of scan lines): 750p (720p)/1125i (1080i)/525p (480p) Audio output: L-PCM 48 kHz sampling	
DC IN (external DC power input) terminal	DC 5 V (for exclusive use with the supplied AC adaptor [VAR-G11])	

Battery life

Shooting	Still image shooting mode	Approx. 350 images: CIPA standard (when the camera's internal memory is used)
	Video clip recording mode	Approx. 110 minutes: Recorded in Full HD mode
Playback		Approx. 330 minutes: Monitor on, continuous playback

- Until battery pack runs out when using a fully charged battery pack at a 25 °C (77°F) ambient temperature.
- The operation time may vary depending on the conditions of the battery pack and the conditions of use. Especially when used at temperatures below 10 °C (50°F), the battery pack operation time is significantly reduced.

SPECIFICATIONS

Possible No. of Images/Possible Shooting Time/ Possible Recording Time

Shooting/ recording mode	Resolution setting	Internal memory	SD Memory Card	
			8 GB	16 GB
Still image mode		15 images	2,390 images	4,800 images
		21 images	3,270 images	6,570 images
		26 images	4,010 images	8,050 images
		38 images	5,920 images	11,800 images
		43 images	6,550 images	13,100 images
		71 images	10,800 images	21,700 images
		76 images	11,300 images	22,700 images
		142 images	20,700 images	41,600 images
		327 images	49,800 images	99,800 images
		15 images	2,390 images	4,800 images
		38 images	5,920 images	11,800 images
Video clip mode		22 sec.	1 hr. 1 min.	2 hr. 4 min.
		29 sec.	1 hr. 21 min.	2 hr. 43 min.
		29 sec.	1 hr. 21 min.	2 hr. 43 min.
		38 sec.	1 hr. 46 min.	3 hr. 33 min.
		15 sec.	42 min.	1 hr. 24 min.
		1 min. 34 sec.	4 hr. 19 min.	8 hr. 39 min.
		43 sec.	1 hr. 58 min.	3 hr. 57 min.
		43 sec.	1 hr. 58 min.	3 hr. 57 min.
Audio recording mode	—	26 min.	67 hr.	134 hr.

- If the continuous recording time of a voice memo exceeds about 13 hours, the recorded file is saved once, and then recording continues in a new file. In the video clip recording mode, when the size of the file being recorded exceeds 4 GB, the recorded file is saved once, and then recording continues in a new file. (These 4 GB segments are automatically created. The recording session continues until you stop recording, but voice memo recording is temporarily interrupted while the file is being saved.)
- The above values apply when an SD Memory Card by SanDisk is used.
- Even with cards of the same capacity, the amount of data that can actually be stored may differ depending on the card brand, etc.
- The continuous shooting time for each video clip will differ depending, for example, on the card capacity, environmental conditions (temperature and shooting conditions, etc.).

SPECIFICATIONS

Concerning the multi-indicator

The camera's multi-indicator will light, flash, or be off, depending on the different camera operations.

Color	Multi-indicator status	Camera status	
Green	Lit	Connected to a computer or printer	
	Flashing	Power save mode active	
Orange	Lit	Connected to a TV	
Red	Lit	Charging	
	Flashing	Slow	Battery charge error or rise in internal temperature
		Fast	During self-timer photography
		Very fast	Accessing memory

Supplied AC adaptor

Part number	VAR-G11	
Power source	AC 100 V to 240 V, 50/60 Hz	
Rated output	DC 5 V, 2.0 A	
Ambient environment	Temperature	0 to 40 °C (32 to 104 °F) (operation), -20 to 60 °C (-4 to 140 °F) (storage)
	Humidity	20 to 80% (no condensation)
Dimensions	35.6 (W) × 77.8 (D) × 57.1 (H) mm 1.40 (W) × 3.06 (D) × 2.25 (H) in.	
Weight	Approx. 128 g (4.5 oz.)	

Supplied Li-ion battery pack

Model number	DB-L90	
Voltage	3.7 V	
Capacity	1,200 mAh	
Ambient environment	Temperature	0 to 40 °C (32 to 104 °F) (during use) -10 to 30 °C (14 to 86 °F) (storage)
	Humidity	10 to 90% (no condensation)
Dimensions	40.9 (W) × 25.9 (D) × 14.6 (H) mm 1.61 (W) × 1.02 (D) × 0.57 (H) in.	
Weight	Approx. 29 g (1.0 oz.)
