Sony Ericsson   WALKMAN   Cyber-shot

KEY TECHNOLOGY

■ TrackID™ Music recognition

TrackID™ is a feature that helps you get information about a song you hear on the built-in FM radio or an external source such as a car or home sound system. Record a few seconds of the song and the name of the artist, album and song will be sent straight to your Sony Ericsson phone.

■ WALKMAN Player 3.0

Sony Ericsson in-phone Walkman® player sorts and presents your music the way you want it.
Choose between album, artist or a playlist of your favourite songs. Plus when a call comes in it automatically mutes and continues when your call is complete. Easy.

Supports the following Audio formats : AAC,

■ SensMe™ Play list your mood

Choose your music to suit your mood with SensMe™, a completely new way to browse music on your Walkman® phone. Search your collection and create playlists based on tempo and style rather than on artist or album.

The unique visual shows each of your tracks as dots in a matrix, placed along a horizontal and vertical axis according to their attributes. This way you can circle a group of tracks that match your mood to create a playlist, or simply select individual tunes as you wish. An alternative to the phone's more conventional music catalogue, SensMe™ is the perfect way to create a soundtrack to your life.

■ BESTPIC Pick the best shot

How many great moments have you missed because you didn't take the picture in time or your subject moved? BestPic™ buffers images while your camera is focussing and gives you nine shots in the space of one second and with one press on the camera key.

Scroll through, pick the best, delete the rest.

■ G700i Note It

Make notes directly to your screen as you would on paper.
Easy to access and helps you keep on top of things. You can use your nail or the stylus, with a touchscreen it's easy! Save it or send it – either way you will be ready for any of life's challenges.

■ W610i
WALKMAN® PHONE

FEATURES
- Walkman® player
- TrackID™ Music Recognition
- 2.0 Megapixel camera with Video
- 512MB M2™ memory card* (included)
