# WELCOME

ASUS M307

Preface

Congratulations on your purchase of an ASUS M307 mobile phone. Read this manual carefully and keep it in a safe place for future reference.

About this manual

Every effort has been made to ensure that the contents of this manual are correct and up to date. However, the manufacturer makes no guarantee regarding the accuracy of the contents, and reserves the right to make changes without notice.

Safety Precautions

For your safety and to keep your phone in good operating condition, read the following tips and reminders carefully before using your phone.

- Do not use your phone while driving, unless you use an earphone or hands-free car kit.

- Switch off the phone while in an aircraft. Wireless devices may cause interference in the aircraft communication and navigation systems.

- Switch off the phone when you are inside a hospital or near medical equipment. Follow hospital rules and regulations on using devices that may cause interference.

- Do not use the phone where blasting is in progress. Strictly observe restrictions where required.

- Use the phone to call for help or to help others during emergencies.

- Ensure that the phone is switched off before removing the battery or SIM card.

- Refer phone servicing only to qualified personnel.

- Treat battery with care. Do not take it apart, expose to fire or high temperature, or short circuit with metal objects.

- Use only approved accessories. Do not connect incompatible products or devices.

3

• For use with battery: MANUFACTURER - WELLDONE for M307 Model. Risk of explosion if battery is replaced by an incorrect type. Dispose of used batteries according to the instructions.

• Switch off the phone when refueling. Do not use the phone near fuels or chemicals.

• Always keep the phone dry and free from dust.

• Follow the instructions in this user guide.

*SAR: 0.594W/kg for GSM Head; 0.487W/kg for DCS Head.

Getting Started

When registering with a service provider, users will receive a SIM card. The SIM card is a computer chip that enables phone making work, containing the phone number, phonebook information, and service provider information.

NOTE:

• Handle the SIM card with care and do not bend it or expose it to static electricity or dirt.

• Be sure to turn off the phone before inserting the SIM card.

16

The SIM Card & Battery Installation

1. Push rightward and unlock the SIM card holder.
2. insert the SIM card in the correct orientation with the gold contacts facedown.
3. Reinstall the battery and press to snap it back into place.
NOTE:

• Use only the battery recommended by the manufacturer. An incompatible battery may cause danger.

• Dispose of the used batteries as instructed by the manufacturer or ask your local authorities for assistance.

• Keep the SIM card out of children's reach. Be careful when handling, inserting, or removing a SIM card to avoid damaging its gold contacts.

17

The SIM card & Battery Uninstallation

1. The battery compartment has a cover latch at the top. Push the latch forward.

2. Lift upward the battery to remove it.

❶

❷
3. Push rightward to unlock the SIM card holder and withdraw the SIM card from it.

❸
The mini SD Card Installation & Uninstallation

1. **Install:** Open the cover and place the mini SD card into the slot with the gold contact facedown.

2. **Uninstall:** Press the mini SD card and it will uninstall itself.

miniSD
Battery Charging

1. Start Charging

1. Connect the charger to a wall outlet.
2. Connect the charger to the charger port at the bottom of the phone in a correct orientation.
3. The battery will then be charged, and the screen will display a charging animation.
1-1. In Charging

1. If the phone is on, the charging animation will appear on the right upper corner of the display. The phone can still be used during its charging process, but it will prolong the charging time.

2. If the phone is off, the charging animation will appear on the display. The phone can still be turned on and used during its charging process. Just press the left soft key (Startup).

NOTE:

1. Strongly suggest users not to use the mobile phone in charging for the healthy's sake.
2. It takes four hours to fully charge the phone for the first time usage and two hours to charge it after that.

1-2. Low Battery Indicators

The battery indicator in the upper right corner of the screen indicates how much charge remains in the battery. When the battery is

19

low, the phone will emit a double beep sound with a message "Battery Low" on the screen to alert users.

2. Charging Complete

The screen will display a charged animation after the battery is fully charged.

NOTE: The first-time battery charging will take 4 hours to complete. After that, the charging time will shorten to 2 hours.

Turning On and Off

Flip open the phone and press 🔲 to turn the phone on and off.

1. SOS

If the SIM card is not installed, the display will show **Check SIM Card!** after users turn the phone on. Press ▭ (SOS) to make an emergency call or press 🔲 to cancel.

NOTE: If **Check SIM Card!** message shows up when the SIM card is installed. Please contact the service provider for further help.Emergency number differs in different countries and areas. For some reason, users may fail to make the emergency call in some countries. **Make the SOS call only when in emergency.**

2. Input PIN Code

SIM card comes with a PIN code. Key in the PIN code after users turn on the phone and press ▭ to clear and re-enter when misdialing. Press ▭ to confirm after that. When the name of service provider shows up, the mobile is ready to use.

Calls Making

1. Common Calls

1. Flip open the phone and enter the number for dialing. Press ▭ (right soft key) to clear the last number and long press to clear all.

2. After the phone number is completed, press ▭ (left soft key) to save it to the phonebook. Or press 📞 to start connecting.

2. International Calls

Long press ✱ (asterisk key) until the "+" is shown and, then enter the country code, the city or area code and phone number respectively.

3. Speed Dialing

3-1. From the phonebook

Users are suggested to save phone numbers to the phonebook for a faster dialing.

In the idle mode, press ▭ to enter the phonebook and use the joysticks (up and down) to select a contact name for dialing. Press 📞 to start connecting.

3-2. From Call Log

Press 📞 to show the dialed and received call history. Select a contact and press 📞 to connect the number.

Call Ending

Press 📞 to end the call.

Volume Adjustment

Press ◁▯▷ buttons on the left side to adjust the volume during the call.

Silent and Hands-free Speaker

Press ▭ to start the silence function and again to stop it during the call.

Press ▭ while dialing or long press 📞 during connecting to enable the speaker and again to disable it.

Call Answering

You can only answer the phone call when the phone is on. When a call is coming, the phone will alert users with a ringtone or a vibration based on users' previous setup. The display will show the incoming number, contact name (only on the contact list) or hidden number.

21

The display will also show the picture if users have set up earlier in the phonebook.

1. Users could just flip open the phone to answer the phone.

2. For answering the call by pressing any key, go to **Settings** > **Call Settings** > **Answering Mode** and select **Any Key**.

Functions During Connection

During a phone call, users can press ▭ to use the following functions.

Option	Discription

1. Activate this function

Enter **Settings** > **Call Settings** > **Fixed Dialing** > **Status Setting** > **On**. Key in PIN2 code to enable or disable this function.

2.Create a number list

Enter **Settings** > **Call Settings** > **Fixed Dialing** > **Number List**. Press ⬜ to choose **Add**. Key in PIN2 code and then edit names and phone numbers.

NOTE: Fixed Dialing needs the support of users' service provider. For users' PIN2 code, please contact the service provider for more details.

8. Other Functions

Options	Discription
Auto Redial	Auto-redial when failing to connect
Speed Dial	Assign phone numbers to keypad number 1~9. Dial the assigned phone number by pressing the corresponding keypad.
Money Keeper	Remind users or directly end the call after a period of time.
Answering Mode	Set up the answering mode to Any Key or Flip.
Call Summary	Display user's connecting time after a phone call.

Call Log

Press ⬜ to check the information of "missed calls," "dialed calls," "answered calls."

The limit of the Call Log is 60 calls and 20 records for each missed call, dialed call, answered call. The previous history record will be dropped from the list when the quota is exceeded.

1. Missed Calls

When there is a missed call, the screen will alert users with a missed call message.

1. Press ▭ to check the missed call number.

2. And press ☐ to check the information of the missed call, such as date and time.

3. Press ▭ after step 1 to delete the record, send a SMS, save the number or save to call barring list.

Users can also check the missed calls by refering to **Calls** > **Missed Calls**.

2. Answered Calls

Go to **Calls** > **Answered Calls** to select an answered call.

1. Press ☐ to check the information of the answered calls such as date and time.

2. Press ▭ to delete the record, send a SMS, save the number or save to call barring list.

3. Dialed Calls

Go to **Calls** > **Dialed Calls** to select a dialed call.

1. Press ☐ to check the information of the missed call, such as date and time.

2. And press ▭ to delete the record, send a SMS, save the number or save to call barring list.

4. Call Cost

Check Call Cost

Go to **Calls** > **Call Cost** to check **Last Call Cost** and **All Calls' Cost**.

NOTE: Call Cost is a network service, which needs supports from service providers. Users need to contact the service provider before using this function.

27

Call Time

Clear Counters

Go to **Calls** > **Call Cost > Clear Counters** and key in PIN2 code. Press ☐ to confirm. Users can use this function after a monthly phone bill comes out.

NOTE: PIN2 code can only accept incorrect input three times and the SIM card will be locked after that. Please contact the service provider for the unlock code "PUK2" if the situation mentioned above happens.

Call Costs' Limit

Users can set up a limit to the total call cost. When the limit is exceeded, the phone then can only receive calls.

1. Go to **Calls** > **Call Cost > Call Costs' Limit** and key in the PIN2 code. The window of cost limit will show up.

2. Enter the planned limits and press ☐ to confirm.

3. If the limit is set to zero, then the Call Costs' Limit will not function.

NOTE:
1. When the call costs' limit is exceeded, users can still make the SOS calls when in emergency.
2. The Call Costs' Limit will only function with the service provider's support. Please contact the service provider before using this function.

Call Time

M307 helps users to easily and precisely monitor their call time. Just go to **Calls** > **Call Time** to check the **Last Duration**, **All Calls**, **Answered Calls**, and **Dialed Calls**.

Users can clear the call time counting after a period of time, just go to **Calls** > **Call Time** > **Clear Counters**. Press ☐ to confirm and enter the phone password. (Default password is 1234.)

28

Call Filter

Call filter helps users avoid unwanted calls. Just put unwelcomed callers' phone number on the **Ignore List**. Unwelcomed calls will be transferred to users' voice mail or the busy signal will be heard depending on the service provider and users will be informed with a missed call message.

Ignore List Modification

1. Go to **Calls** > **Call Filter** > **Ignore List**.

2. The first default option "Unknown Call" can only be enabled or disabled. Press ▢ to select this option, all unknown calls will be blocked.

3. Select an "EMPTY" space and press ▭ to start modifying. Enter the number for ignoring and press ▢ to confirm.

Ignore List Deletion

1. Go to **Calls** > **Call Filter** > **Ignore List**.

2. Select a phone number and press ▭ to choose **Delete** or **Delete All** to delete the number or all blocked numbers.

Moreover, the function of Call Filter also helps users to make a personal Privileged List. Callers out of the list will be transferred to users' voice mail or the busy signal will be heard depending on the service provider and users will be informed with a missed call message.

Privileged List Modification

1. Go to **Calls** > **Call Filter** > **Privileged List**.

2. Select an "EMPTY" space and press ▭ to start modifying. Enter the number to give privilege and press ▢ to confirm.

Privileged List Deletion

1. Go to **Calls** > **Call Filter** > **Privileged List**.

2. Select a phone number and press ▭ to choose **Delete** or **Delete All** to deprive the privilege of the selected number or all phone numbers.

Filter Setting

Go to **Calls** > **Call Filter** > **Filter Setting**. Users can stop the this function or activate either **Ignore List** or **Privileged List**.

29

Security

1. PIN

To protect users' privacy and avoid personal information theft, users can activate PIN protection. In this way, users have to enter the PIN code before turning on the phone and use.

1. To activate PIN protection, go to **Settings** > **Phone Settings** > **Security** > **PIN**.

2. Enter the PIN code to enable or disable this proctection.

3. Press ⬜ > **Modifiy** to modify the PIN code.

2. Phone Lock Code

Phone lock code offers an extra protection for your own privacy. When this function is activated:

1. Go to **Settings** > **Phone Settings** > **Security** > **Phone Lock Code**.

2. Enter the password to **Activate** or **Deactivate** the lock.

3. Press ⬜ > **Modify** to change the password. Or press ⬜ > **Deactivate** to disable this function.

1. The password is limited to 8 numbers.
2. PIN, PIN2, and Network Code are provided by the service providers.
3. The default Phone Lock Code is 1234.

Text Entry

To add contact names to the phonebook, send a text message, or use the WAP browser, M307 provides several text input methods for users to choose from. Users can either key in letters respectively or use predictive text entry, which helps complete possible words for users. Also, Chinese characters (traditional and simplified) input and symbols insertion are enabled.

Basics

1. Use the alphanumeric keyboard to enter letters and numbers. Each key is assigned several different characters.

2. Press the right soft key to delete a letter when mis-typing.

3. To enter symbols or spaces between words, press the asterisk key, and the symbol table will be shown. Use the Joystick Keys to navigate and select the needed symbol.

Key	Assigned Characters
1	. , ? ! @ : ' ( ) % & 1
2	A B C 2
3	D E F 3
4	G H I 4
5	J K L 5
6	M N O 6
7	P Q R S 7
8	T U V 8
9	W X Y Z 9
0	0, symbol table list

Text Input Methods

For text entry, press ⌗ to switch input methods (the default is **abc**; press ⌗ to switch to **ABC**) for entering small letters or capitalized ones. Select **eng** to use the predictive text entry, and navigate with joystick keys to select the wanted words.

Multitap Text Entry

Multitap text entry enables users to enter individual letters one by one. This is ideal for adding a phonebook entry or entering a WAP address.

When pressing a key, the characters assigned to the key will appear in the upper right corner of the screen. Repeated presses to select one for entering. Enter the next letter in the same way after the previous selected letter appears on the screen.

31

Smart Text Entry

Smart Text Entry

Smart text entry is a predictive text entry method. It uses a built-in dictionary to predict the word users are typing. Users can choose the correct word by pressing keys without selecting the right letters and obtain the words suggested by the phone. By reducing the number of keystrokes, the smart text entry method helps users to key in messages more quickly.

Whenever a key is pressed, a list of possible characters or character combinations is created. To enter text, use the joystick keys to find the wanted character combination. Press the right joystick key to proceed the message composing. If mistakes happen, press ⬜ to clear**.**

Note:

For smart text entry to work properly, ensure the language settings in your phone match the language you want to type in. For language settings, see Phone Settings under Settings.

Common Words Text Entry

Common Words text entry allows users to create a list of useful common phrases for message composing. To use this time-saving method, select **Option** > **Common Words** when editing a message to input built-in phrases or go to **SMS** > **SMS Settings** > **Common Words** to customize common words.

Symbols Text Entry

With this method, users can enter various types of symbols. Select **Option** > **Input Method** > **Insert Symbols**. A list of symbols is displayed. Use the joystick keys to select the desired symbol and select **OK** when done. Users can also press the key "0" as a shortcut to open the symbol table.

32

Common Settings

Common Settings

In the **Settings** section, users can customize their preference setup, such as ringtones, display settings, date/time or language.

Date/Time

Go to **Settings** > **Phone Settings** > **Date/Time**.

1. Select **Set Date/Time** and key in with keypad. Press ☐ to confirm.

2. Go to **Set Time Zone** to locate your home city or the nearest one and press ☐ to confirm.

3. Go to **Date Format** and set a wanted format--**DD.MM.YYYY**, **MM.DD.YYYY**, or **YYYY.MM.DD**.

4. Go to **Time Format** to choose **24-Hour** or **12-Hour**.

5. Users have to press ☐ to select **Show Date** and **Show Time** in **Settings** > **Displays Settings** > **Main Idle Screen** first and the date/time will show up then.

Language

Go to **Settings** > **Phone Settings** > **Language** to set up the language display.

Shortcut

Go to **Settings** > **Phone Settings** > **Shortcut**. Selcct an (EMPTY) space and press ⬭ to start editing. Choose one function from the **Shortcut List** and press ☐ to confirm.

LED

Go to **Settings** > **Phone Settings** > **LED** to start or stop the LEDs, including **Mtc LED**, **Event LED**, **Charging LED**, **Low Battery**, and **Normal LED**.

Auto Keyboard Lock

This function can prevent users from misdialing or necessary operation.

1. Go to **Settings** > **Phone Settings** > **Auto Keyboard Lock**.

2. Select a time interval and press ☐ to confirm.

33

When the keyboard is locked, users can still press 🔽 to answer the incoming call and operate other functions normally during the call. The keyboard will remain locked after users end or reject the call.

Greeting Text

Users can personalize the greeting text. Simply go to **Settings** > **Phone Settings** > **Greeting Text**. Enter an unique greeting text and press ⬜ to confirm.

Factory Settings

This function will help users to restore to the default settings and keep users' **Phonebook**, **Organizer** and **Message**.

1. Go to **Settings** > **Phone Settings** > **Factory Settings**.

2. Key in the Phone Lock Code and press ⬜ to confirm. The phone will auto-restart and restore to the default settings.

Firmware Upgrade

Users can easily upgrade the firmware of M307 with a mini SD card.

1. Download the latest firmware file (.bin file) from tw.asus.com.

2. Place the bin file into a mini SD card and install the card to the phone or save the file to the phone through the mini USB cable.

3. Restart and go to **Settings** > **Phone Settings** > **Firmware Upgrade**.

4. Locate the latest bin file **From Phone** or **From Memory Card** and press ⬜ to confirm.

5. After the upgrading , remember to restart the phone.

34

Manner

In the **Manner** menu, users can select manners, including **Normal**, **Meeting**, **Indoor**, **Outdoor**, **Custom** and even further personalize and rename those manners.

NOTE: Long press `#` in the idle mode, users can enter the Manner menu directly.

Personalized Manners

1. Go to **Manner** menu and press `⊟` to select **Personalize**.
2. Manners for personalization is as following:

Mass Storage

M307 supports mini SD card, so users can use the handset as a card reader for an easy file storage and transmission.

1. Connect the USB cable to the handset and the PC.

2. Go to **Settings** > **Transmit** > **Mass Storage**, and press ☐ to confirm.

3. A message **Mass storage connecting, please do not remove the USB cable!** will show up.

4. Click **My Computer** on the desktop, a **Removable Disk** will appear.

5. Browse, edit, delete, upload and download files from the mini SD card.

6. Press ☐ (Close) to remove the Removable Disk after editing.

NOTE: Do not remove the USB cable during this function operating.

Installing the Handset Manager

Ensure that the following system requirements are met:

Software:

• Microsoft Windows 98 or above system

Hardware:

• USB 2.0 port

• CD-ROM driver

You can also edit voice mail details or connect to a voice mail account here.

NOTE: Voice mail is a service provider feature. Contact your service provider for voice mail numbers and settings or other voice mail assistance.

To install the Handset Manager software:

1. Insert the software CD into your computer to start installation.

2. On the start-up page, select the mobile phone model and interface you wish to install.

3. Turn on the phone and connect it to the computer using the supplied USB cable.

   When you turn on the phone, the phone prompts you to select a type of USB connection. Select COM Port.

4. Click OK on the phone keypad to proceed.

5. Click Install Handset Manager.

NOTE:

• Make sure the mobile phone is switched on and correctly connected with the USB data cable before installation.

• Most systems already support USB. However, if your system does not, install a USB driver before installing the Handset Manager software.

• To uninstall software, click the Add/Remove Programs icon in the control panel. Select the ASUS M307 USB-Handset Manager from the list. Click the Remove button and follow the instructions on screen.

72

Starting the Handset Manager

To start the Handset Manager:

1. Connect your handset to a USB port on your computer using the supplied USB data cable, then turn on your handset.

2. A list of connection types appears in the handset window. Select COM Port.

3. Select Asus M307 USB-Handset Manager > Asus M307 USB-Handset Manager from the computer's program list, OR

   Right click the phone icon in the system tray in the lower right corner of the screen. Select Handset Manager.

4. An animation in the Handset Manager main panel shows your connection status.

NOTE:

• Be sure to unplug the USB cable after use. The computer may not boot as usual if you start the computer with the phone's USB cable connected.

• When disconnecting the mobile phone from the computer while using Handset Manager, first turn off the handset, then disconnect the USB cable. When transmitting data to the Handset Manager, don't disconnect the handset.

• While transmitting and editing data, don't operate the phone and Handset Manager at the same time.

• Don't install Java Games through Handset Manager while simultaneously playing Java games in the mobile phone.

Main Panel

The following illustration shows the main panel. Access all the Handset Manager functions from this Panel.

73

Main Panel
Access the Handset Manager tools by clicking on the icons at the bottom of the screen. Each tool has its own interface, which opens when you click on the icon.

Phonebook

Message

Album

MMS

File Manager

Video

Sound

Clicking the three buttons in the upper right corner of the main Handset Manager panel does the following:

Closes Handset Manager and minimizes the system tray.

Minimizes Handset Manager to the task bar.

Opens online help and settings.

Settings, Information, and Online Help

You can access several items related to settings, information, and online help by clicking on the 🛈 icon.

- Select Help Topics to open online help. You can also open online help from the program list: Asus M307 USB-Handset Manager > User's Guide.

- Under Settings, you can select whether to run the Handset Manager automatically when you start the computer. You can also set the computer port, handset model, and interface type manually here.

- Select Handset Version to see the model name and firmware version of the phone, when the phone is connected. Select About Handset Manager to see the version of Handset Manager installed in your computer.

74

Navigating the Handset Manager Tools

No matter which Handset Manager tool you are working with, you can access functions and commands in the following three ways. The Messages window is shown as an example.

1. Right-click to bring up the pop-up menu or click icons on the menu toolbar, OR

2. Click on the File button 📄 in the upper left corner to choose from a drop-down menu, OR

3. Click on the icons in the upper right of the window.

File Button   Icons for Functions

When you move the mouse over an icon, a pop-up window tells you the name of the button.

NOTE: You must exit one tool before launching another.

Navigating Media Files

The interfaces for media tools-MMS, Sound, or Album and Video-are quite similar. The Album interface is shown here.
1. Preview Pane   2. Phone File Location
3. Phone Files   4. Icons for Functions
5. File Path/ Browse Icon
6. Thumbnails of Computer Files

75

- The left preview pane shows a preview of the files you select. A drop-down menu on the left lets you select the location of phone files. Select Handset or Memory Card.

- Thumbnails of files in the phone are shown in the lower left pane.

- Icons in the upper right corner give access to various functions, such as copy, paste, and delete. Also in the upper right, a frame shows the current file path, next to the browse icon ⬚▬. If you want to choose another file location, click this icon. The browse icon and drop down menus give you access to computer files only.

- Thumbnail views of computer files in the selected location are shown in the lower right pane.

Transferring Files to and from the Handset

- To edit a file in your handset, download the file to your computer by clicking on the Download icon 🖉 in the upper right. The download function does not save the

file on your computer. To save the file on your computer you first download it as described above and then right-click and select Save from the dropdown menu. You can then save the file to a specific location on your hard disk.

- To add a file to the handset, click on the Update icon 🖉.

- To refresh the folder display click the Refresh icon 🖫.

NOTE:

• As used in the Handset Manager software, the term update has the same meaning as upload.

• You do not necessarily need to select a folder on the phone's handset or miniSD card. The Handset Manager automatically locates the appropriate folder for the file type.

Handset Manager Folder Location

The Handset Manager creates a default folder in the My Documents folder in Windows. Find this folder in My Documents > Mobile Action > Handset Manager. There are also sub-folders for the different types of files you can work with in the Handset Manager.

NOTE: To locate handset files using the handset screen, go to Organizer > File Manager.

Handset Manager Icon

A Handset Manager icon appears in the system tray, even when the Handset Manager is minimized. By right-clicking the Handset Manager icon in the system tray, you can select the following Handset Manager functions: Handset Manager, SyncManager, SyncManager Settings, and Exit.

The appearance of the icon in the system tray indicates the current status:

- Handset Manager is connected with the handset.

- SyncManager has launched auto-synchronization.

- The handset is disconnected from Handset Manager.

NOTE: When you close the Handset Manager window, the application remains running in the background. To completely exit Handset Manager, right click and select Exit.
