Ⅵ. **Software Installation (MP3 player Disk Tool in disk)**

It is important to correctly install the drives on your PC before connecting the MP3-Player with it. There is a Windows Installer Package on the Driver CD. If your OS system is Window 98 ,when you insert this Driver CD into your CD-ROM drive, your PC will automatically install the driver.

Disconnection with the computer.
Press the sign "Plug-and-Play" with the right key of the mouse, appears the sign "Delete the hardware safely" and the communication box appears when confirmation. Pull out the player after confirmation accordingly. Formation.
Please make sure to choose the "FAT" form when formatting and then continue to use.

Ⅶ. **Upload and download from computer.**

1>After the software setup, connect the player with the computer when upload or download (use copy method)MP3/WMA files, Connect Mp3 player to PC with USB cable.
2> After connection OK , LCD display the sign of the connection with computer. Then the computer will automatically search the movable hard disk.

14

If you want to connect with PC, please connect the line with player first, then connect to PC port, if you want to disconnect the device, please Press the sign "plug-and- play" with right key of the mouse, appears the sign "Delete the hardware safe ly" and the communication box appears when confirmation. Pull out the player after confirmation accordingly. Disconnect PC port first then disconnect the device. Improper operation may cause program stop. Any improper operation method may cause the documents missing, and the manufacturer is not responsible for the above things.

Warning!
Please format this unit by FAT! Don't format by FAT32. Because internal F/W takes some space, so the actual memory may be smaller than the labelled space, it is within natural range.

The device will cause no damage to the environment.
